Logging In

Open the panel address in your browser, for example `http://your-server-ip/` or your panel domain.

1. Enter your **Username** and **Password**.
2. Choose the panel **language**.
3. If shown, solve the captcha.
4. Click **Login**. If two-factor authentication is enabled for your account, enter the 6-digit code from your authenticator app.

Login problems

Problem	Solution
Wrong username or password	Check upper and lower case. Ask your administrator to reset the password.
Too many tries, try again in 1 minute	Login is blocked for one minute after several wrong passwords.
Login fails although the password is right	Your account may be disabled, or assigned to a site and must log in through that site's address.
Only administrators can log in	The license is not active or the site is set offline. Contact your administrator.

The SAS Radius mobile app is available on Google Play and the App Store (links on the login page).

> The default administrator login after installation is `admin` / `admin`. **Change it immediately** (account menu → Profile → Change Password).
