Manager Advanced Settings and Limits

These fields are at the bottom of the manager form and are shown to **system administrators** only (Group, Site and Allowed PPP Services need their own permissions).

Advanced Information

Field	Description
Subscribers Prefix / Subscribers Suffix	Text added automatically before / after the username of every new subscriber created for this manager. Example: prefix `ab-` + username `john` = `ab-john`. Existing users are not changed.
Group	The manager's group (needs *Groups - Assign*). See Assign to Site and Group.
Site	The manager's site (needs *Settings - Sites Management*).
Debt Limit	How far the manager's balance may go **below zero**. Example: Debt Limit 100 = the manager can keep activating until the balance reaches −100. Default 0.
Discount Rate (%)	A discount on this manager's profile prices when activating subscribers. With a discount, the full amount goes to the admin and parent managers don't receive a commission.
Address List	A MikroTik firewall address list. Sessions of this manager's subscribers are added to it, for example to route a reseller's subscribers differently.
Allowed PPP Services	Limit the manager's subscribers to certain PPPoE service names (needs *Managers - Lock managers to PPP service*). Can be set only after the manager is saved; each change is saved immediately.
Allowed NAS(s)	The routers (NAS) this manager's subscribers may connect through. Leave empty for no restriction.
Requires Two Factor Auth	Asks for a code from an authenticator app at login. The manager must first set up 2FA in their profile. Turn it off to help a manager who lost their phone. See My Profile, Password and 2FA.
Ignore Captcha	Skip the login captcha for this manager (when the captcha is enabled in Settings).
Admin Notes	Private notes for administrators. Add them when editing the manager.
Force Password Change	The manager must choose a new password the next time they open the panel.

Manager Limits

Limits count the actions this manager performs on **subscribers** in the current calendar month. Turn the switch on and set the monthly number. When the limit is reached the action is refused with *access denied*.

Limit	Counts
Limit Deletes / Monthly Deletes	Subscriber deletions.
Limit Renames / Monthly Renames	Subscriber renames.
Limit Profiles Changes / Monthly Profile Changes	Subscriber profile changes.
Limit MAC changes / Monthly MAC Changes	MAC address changes, per subscriber.
Max number of users	Maximum number of subscribers the manager can own directly (0 = unlimited). When reached, creating a user shows *Exceeded Users Limit*.

Required permission: Managers - System Administrator
